

# Hiding File Recommendations

When you first log into FireantLLC, you will see a couple of file recommendations. If these are in the way or are just annoying, this page shows you how to hide them.

To start, make sure you have either navigated to the Files app or to [www.fireantllcaz.net](http://www.fireantllcaz.net).

Click on `Settings` in the bottom-left hand corner, then uncheck `Show recommendations`.
